

THE 5R GUT HEALTH PROTOCOL

The 5R Framework offers a simple, step-by-step method for addressing even the most challenging gastrointestinal cases. Use this guide to match Praxera's digestive health products with each phase of gut support.

01 REMOVE

Promote a healthy microbiome and normal inflammatory response by “weeding out” gut offenders, such as overgrown bacteria, yeast, or parasites. Many clinicians also remove inflammatory foods, such as gluten, dairy, and processed sugar products.

- » VIRA-SHIELD
- » CANDID-AWAY™
- » GRAPEFRUIT SEED EXTRACT
- » OLIVIR™ 15

02 REPLACE

Give the digestive system what it needs to properly break down foods, foreign organisms, and allergens. Provide digestive factors such as enzymes, betaine hydrochloride, and bile acids.

- » DIGESTIVE ENZYMES
- » DIGESTIVE ENZYMES PRO
- » ENZYME BENEFITS™

03 REINOCULATE

Support the gut microbiome with prebiotics, probiotics, and fiber. Proper microbial balance means fewer digestive symptoms and a strong immune system.

- » MEGA PROBIOTIC™ ND 50
- » DAILY BEST™ PROBIOTIC
- » DIGESTIVE ENZYMES CHEWABLE WITH PREBIOTICS & PROBIOTICS
- » PREBIOTIC FIBER
- » ARABINOGALACTAN POWDER

04 REPAIR

A cornerstone for improved gut health includes strengthening intestinal barrier integrity and restoring its function. This step is critical for addressing gastrointestinal concerns while supporting digestion, bowel regularity, a calm immune response, and a healthy microbial environment.

- » L-GLUTAMINE POWDER
- » IMMUNO BENEFITS™

05 REBALANCE

Engineer a healthy lifestyle to promote proper gut function for once and for all. Improve lifestyle factors such as sleep, exercise, and nutrition habits, which can all affect the gut. Persistent stress can cause damage to the gut lining, making stress management a key requirement for long-term gut health.
